

```
nlohmann::detail::output  
_adapter_protocol< CharType >
```

```
graph BT; A[nlohmann::detail::output_stream_adapter< CharType >] --> B[nlohmann::detail::output_adapter_protocol< CharType >];
```

A diagram illustrating a relationship between two C++ classes. At the bottom is a grey rectangular box containing the text `nlohmann::detail::output_stream_adapter< CharType >`. A blue arrow points vertically upwards from the top center of this box to the bottom center of a white rectangular box above it. The white box contains the text `nlohmann::detail::output_adapter_protocol< CharType >`. This visualizes that `output_stream_adapter` inherits from or is a specialization of `output_adapter_protocol`.

```
nlohmann::detail::output  
_stream_adapter< CharType >
```
